Preface

Life Sciences/Biotechnology is a field at the cutting edge of science. The exponential increase in the quantity of scientific information and the rate, at which new discoveries are made, requires very elaborate, interdisciplinary and up-to-date information and their understanding.

This book contains previous year's solved papers of GATE Life Sciences/Biotechnology. These questions can be used as a kind of self-examination to evaluate the extent of preparation. This is designed to provide you the current pattern of questions and measure the level of understanding and their applications.

We hope you will find this book interesting, relevant and challenging. Any book of this kind requires meticulous and painstaking efforts by all its contributors. We thank Ajay Kumar, Pramod Mittal and Manish Gupta whose comment and suggestions were invaluable in improving the text.
